W: WWW.DANHUNT.CO.UK

Personal Profile

A well organised self-motivated team player who enjoys working in a cooperative environment as well as using own initiative. Creatively led with a strong backing of technical skills and ideas which enables a crossover of disciplines when working in small teams. Used to liaising with clients and has a good understanding of business. An excellent communicator at all levels with the ability to work to tight and demanding time schedules in a competitive working environment.

Creative Skills

Conceptually driven functional design.

Balance of creativity and technology providing excellent execution of ideas.

Awareness of cultural trends and market developments.

Knowledge of Interactive methods, user behaviour, applied usability and accessibility.

Production Skills

W3C Standards compliant XHTML/CSS, Accessibility, Flash, Actionscript, Fireworks, Photoshop, Dreamweaver, Contribute.

Employment History

2002 - Present: Trinity Expert Systems

Design, development and analysis of websites using various skills and techniques for a range of organisations. This includes creating templates and content creation interfaces for Microsoft Office Sharepoint Server based intranets, producing W3C standards compliant, accessible and cross browser compatible html/css for developer integration and creating interfaces for bespoke applications. This role involves working as part of a small team as well as working alongside other departments within the company, liaising with clients and management of own projects.

2001 - Present: Freelance Web Production

Various freelance projects including the designing and building of property and finance sites, a Contribute managed learning skills website, flash based promotional CDs, photography for a fancy dress retailer and marketing e-flyers and website for a restaurant. Please see www.danhunt.co.uk for current portfolio of work.

2001 - 2004: Flash Tuition at Cirencester College

Educating small groups of professionals on the concepts of Flash. Areas include animation, navigation, interactivity, Actionscript techniques and publishing for a variety of formats.
